

Instalación MNE mediante CONDA:

```
Anaconda Prompt - conda up  X + ~
(IISB_Clase1) C:\Users\User>conda update --name=base conda
Channels:
- defaults
Platform: win-64
Collecting package metadata (repodata.json): done
Solving environment: done

# All requested packages already installed.

(IISB_Clase1) C:\Users\User>conda --version
conda 24.7.1

(IISB_Clase1) C:\Users\User>conda create --channel=conda-forge --strict-channel-priority --name=mne mne
Channels:
- conda-forge
- defaults
Platform: win-64
Collecting package metadata (repodata.json): done
Solving environment: done

## Package Plan ##

environment location: C:\Users\User\anaconda3\envs\mne

added / updated specs:
- mne

The following packages will be downloaded:
package          build
-----|-----
_libavif.api-1.1.1|h57928b3_1      9 KB  conda-forge

#
# To activate this environment, use
# $ conda activate mne
# To deactivate an active environment, use
# $ conda deactivate

(ISB_Clase1) C:\Users\User>conda activate mne
(mne) C:\Users\User>

```

Mediante CONDA no se identificó ningún problema, se siguieron todas las indicaciones de la página junto con algunas especificaciones de CHAT GPT.

Installing MNE-Python with all dependencies

If you use Anaconda, we suggest installing MNE-Python into its own `conda` environment.

First, please ensure you're using a recent version of `conda`. Run in your terminal:

```
$ conda update --name=base conda # update conda
$ conda --version
```

The installed `conda` version should be `23.10.0` or newer.

Now, you can install MNE-Python:

```
$ conda create --channel=conda-forge --strict-channel-priority --name=mne mne
```

This will create a new `conda` environment called `mne` (you can adjust this by passing a different name via `--name`) and install all dependencies into it.

If you need to convert structural MRI scans into models of the scalp, inner/outer skull, and cortical surfaces, you will also need to install [FreeSurfer](#).

Activar el entorno virtual:

- Después de crear el entorno, áctívalo con el siguiente comando:

```
bash
conda activate mne
```

- Escribe un pequeño script de prueba para verificar que MNE-Python está funcionando correctamente. Por ejemplo:

```
python
import mne
print(mne.__version__)
```

Después se realizó la verificación de la correcta descarga de MNE en VISUAL STUDIO CODE.
